MADE IN ITALY

Test&Charge Series

Features

- Suitable for charging lead batteries: WET serviceable and maintenance free, AGM, AGM Power, GEL, Start&Stop.
- **Multi step charging**
The batteries are charged by applying sophisticated multi-step programs. Desulphation and analysis of the battery are included.
- **High efficiency**
"I-U" Charging characteristic (constant current - constant voltage) minimises battery charging time.
- **"Floating" (max power) & "Pulse Maintenance" maintenance function.**
They can remain connected to the battery for a long time. They keep the battery ready for use through the pulse charge.
- **"Recond Battery" refresh function**
It regenerates batteries that have undergone heavy discharge cycles.
- **Safety guaranteed**
Designed to protect vehicle electronics. Non-sparking. Reverse polarity protected and short-circuit proof.
- **IP65**
Lightweight and compact battery charger. Built for outdoor use.

MADE IN ITALY

Test&Charge Series

Features

- **Stabilized power supply**
Power supply to support diagnostics and setup of automotive electronic control units. Back-up function to power vehicle electronics while the battery is being replaced.
- **Power supply for showrooms vehicles**
(with or without battery); "lockup" function to avoid improper use; option for automatic start up when powered by the network.
- Stabilized power supply adjustable in voltage and current for particular uses.
- Thanks to the SD Card reader, it is possible to update the software adding new charging programs.
- It is possible to use cables of different

FL2213D

Test&Charge Series

تاجر شحن وأختبار بطاريات ذكية Professional microprocessor-controlled battery charger and starter.

Features

- **"Safe Charge & Boost"**
The system protects the electronic components on the vehicle against interference
- **4 Multi step charging programs**
The lead batteries WET, AGM, GEL, Ca/Ca and traction "Deep cycle", are charged by applying (Charging- Equalization- Maintenance ("Floating")- Desulphation)
- **"Booster" function** for start assist.
- **Temperature sensor**
It automatically compensates for any charging voltage according to ambient temperature.
- **Battery check**
The battery charger checks if the battery is sulphated and if it can store the charge.
- **"Memory"**
The function makes this product easy to use: Just connect the battery charger to a battery and to the mains and charging begins following the last programme set.
- **"Back-up"**
The function powers the vehicle electronics while the battery is being replaced so that saved data are not lost (radio and seat settings, for instance)

Technical details

Test&Charge Series

Features

- **"Safe Charge & Boost"**
The system protects the electronic components on the vehicle against interference and overvoltage that may be created at the charging or quick starting procedures.
- **Multi step charging**
The batteries are charged by applying sophisticated multi-step programs.
- **Floating**
It can remain connected to the battery for a long time.
Batteries are ready to use at all times.
- **Continuously adjustable charge current.** lets you charge optimally batteries of all capacities (Ah).
- **Charging with timer**
- **Boosting remote control**
- **Digital Voltmeter / Ammeter**
- **Overload protection with automatic reset**
- **Inversions of polarity and short circuits protection**
- **Heavy duty clamps**

A/C Machine Series

ماكينة سحب زيت الفتيس الأوتوماتيك Automatic Transmission Cleaner And Oil Exchanger ATF 3000 PRO

Features

- ATF is an automatic transmission oil change device. It is based on changing the transmission oil of most types and models of transmission, automatic transmission, which helps restore the speed performance of the gearbox and reduces vibrations and oil consumption.
- It is equipped with a complete set of connections to suit European, Japanese and Korean cars. And the Asian one.
- It determines the quantity precisely to avoid problems with the amount of excess/deficient oil.
- It withdraws the old oil and pumps it out again accurately, it performs a full cycle washing process to remove all sediments, to access the Smart Pack database, the possibility of entering the system, via the Internet.

المميزات

Technical details

- Kit 1: It contains the fittings of EU and Asian cars dated <2001.
- Kit 2: it contains adapters and fittings for cars from 2002 to the most recent ones.
- Dipstick: Device for operating on sealed gearboxes without heat exchanger or in case.
- SmartPack: Password for free access (for 12 months) to the database with reserved technical information (pictures, a fitting location, etc) and video with a practical demonstration performed on the car.
- Magnetic liters' counters: Useful for visual control of the levels (used oil, new oil).
- 220V version with power switch and protection against short circuits and overloads.
- Lighting of the internal tanks: Essential for the visual control of the different types of ATF oils in the tank
- 500ml additive injector with protection against mishandling.

المواصفات الفنية

- المجموعة ١: تحتوي على تجهيزات سيارات الاتحاد الأوروبي وآسيا بتاريخ < ٢٠٠١
- المجموعة ٢: تحتوي على محولات وتجهيزات للسيارات من عام ٢٠٠٢ إلى أحدثها
- مقياس العمق: جهاز للعمل على علب التروس المختومة بدون مبادل حراري أو في حالة الباقية الذكية: كلمة مرور للوصول المجاني (لمدة ١٢ شهرا) إلى قاعدة البيانات مع المعلومات الفنية المدجوزة (الصور ، موقع التركيب ، إلخ) والفيديو مع عرض عملي يتم إجراؤه على السيارة
- عدادات اللترات المغناطيسية: مفيدة للتحكم البصري في المستويات (زيت مستعمل ، زيت جديد)
- إصدار ٢٢٠ فولت مع مفتاح الطاقة والحماية ضد الدوائر القصيرة والأحمال الزائدة
- إضاءة الخزانات الداخلية: ضرورة للتحكم البصري في الخزان ATF الأنواع المختلفة من زيوت
- حاقن مضاف ٥٠٠ مل مع حماية ضد سوء التعامل
